ON-SITE INSTALLATION SERVICES

Pumps are one of major equipment in many industrial processes. Incorrect pump installation procedures can be a caused for system shutdowns and emergency repairs. Thus, to avoid all these problems, we offer on-site installation for your pumps. We have experience undertaking a range of pump installations for both new and existing pumps. Even your pump is not originally from our warehouse, we are glad to help you to install it to your pumping system. Our team are experts when it comes to pump installation at site. When the installation procedures is being carried out correctly, it helps in ensuring the pump's lifetime, system running smoothly and optimum performance during the operating time.

During on-site installation, the following points are addressed:

- » Detailed examination of the pumping system
- » Ensure all the bolts, nuts, accessories and piping are perfectly install with pump
- » Provide T&C (Testing & Commissioning)
